

Galvezia juncea & Horticultural Selections

Baja Bush-snapdragon

WOODY SUBSHRUB - evergreen.

3' high, 3' spread.

Much branched. Slender stems
erect or spreading.

Small, light green leaves glabrous
and glaucous.

Red flowers - spring to summer.

Native habitat: coastal sage scrub,
scrub - hillsides along arroyos
and occasionally on plains.

Baja California endemic.

Galvezia juncea 'Grand Canyon'
and *Galvezia juncea* 'Punta
Banda' are cultivars.

Full sun to part shade.

Water 2 x /month.

Attractive to butterflies and hummingbirds.
Will cascade over a wall.
