

Artemisia tridentata

Big Sagebrush, Basin Sagebrush

SHRUB - evergreen
2 - 10' high, equal spread.
Rounded.
Silvery leaves, 3-lobed at tip,
very aromatic.
Flowers - August to October.

Native habitat: sagebrush scrub,
chaparral, yellow pine for-
est, pinyon juniper wood-
land; dry slopes, plains
and valleys above 1000'
- Baja California, Western
US including California.

Full sun.
Frost resistant.
Needs good drainage, coarse
soil.

Good for erosion control.
Good food and cover for quail.
