

*Astragalus nuttallii*  
Nuttall's Milkvetch

PERENNIAL - evergreen.

To 3' high, spreading to 6' wide.

Hairy leaflets will vary from gray to green depending on conditions.

Flowers are creamy with occasional lavender tinge

- can bloom all year but mainly spring and summer.

Seed pods are air-filled bladders.

Native habitat: Sandy areas on dunes, open bluffs below 50'

- from north coast of California to Baja California.

Full sun.

Can tolerate high salt concentrations.

Will be greener with some water - 1 to 2 x / month.

Good small-scale ground cover.
