

Clematis ligusticifolia
Western Virgin's Bower

WOODY, TWINING VINE - deciduous.

Climbing to 20'+ over fences and shrubs and into trees.

Compound leaves of 5 or 7 leaflets.

Creamy bracts appear star-like - April to June.

Plumed seed head follows into fall. Slightly fragrant.

Native habitat: along streams and moist places, below 7000' -
throughout California and beyond.

Full sun to light shade.

Frost resistant.

Best in well-drained soil.

Needs ample moisture.

Good privacy screen, arbor cover.

Provides shade for roots.
