

Epilobium ciliatum (*Epilobium californicum*) Fringed Willowherb

PERENNIAL Herb
1.5 - 3.5' high, 1' wide. Erect.
Upright stems. Leaves narrowly lanceolate to ovate.
Small white to pink or lavender flowers on branched
inflorescence. Jun - Oct.

Photographs by John Doyen

Native Habitat: disturbed areas, moist meadows,
streambanks, roadsides all over California below
14000'.

Full sun to partial shade.
Not sensitive to drainage.
Low to high water use tolerant.

Not a spectacular plant, but good in pollinator gardens.
