

Iris douglasiana 'Canyon Snow' Douglas or Coast Iris

HERBACEOUS PERENNIAL

1' high, 4' spread. Clumping.

Spreading by rhizome.

Long shiny green leaves.

Pure white flowers with yellow nectar guides - February to May.

Horticultural selection from *Iris douglasiana* 'Alba.'

Sun to part shade.

Frost tolerant.

Can tolerate range of soil. Loose, rich soil encourages growth and spreading of rhizomes.

Needs some year-round water - (1 - 2 x /month) once established.

Divide rhizomes in fall.

Good border or accent plant.

Lovely in clumps, mats, among or under trees and shrubs.
