

Lessingia filaginifolia var. *californica*
(now *Corethrogyne californica*)

Beach Aster, Sand Aster, Carmel Aster

PERENNIAL

1' high, 4 - 6' spread.

Silver/white leaves tapered and toothed.

Flower heads lavender - summer to fall.

Native habitat: coastal sage scrub, oak woodlands, grasslands
below 3500' — central western and north coastal California
to southwest Oregon.

Full sun to part shade.

Good drainage. Little summer water (1 - 2 x /month).

Attractive groundcover.

Varieties can intergrade. Do not plant near native *Corethrogyne filaginifolia*
species.
