

# *Lewisia* 'Pink Cloud' Cliff Maids

PERENNIAL, SUCCULENT

To 8" high, forming crowns.

Succulent leaves are  
spatula shaped.

Flowers are bright pink above the green leaves — Spring to  
summer, longer nearer the coast.

Sun or part shade near the coast, part shade inland.

Very well drained soil, with gravel around the crowns in older  
plants.

Water only when dry.

Good for rock gardens and in pots.

Very attractive.
