

Lupinus chamissonis

Dune Lupine

SHRUB, bushy,
To 6', spreading.
Leaves have silvery hairs.
Light violet to blue flowers in whorls
— April to June.

Native habitat: coastal strand, dunes
below 500' — from northern
California to the Los Angeles area.

Full sun.
Prefers beach sand. Tolerates saline,
sandy soils.
Doesn't need much water.

Good for birds and bees.
Deer resistant.
Fast growing.
