

Monardella viminea (*M. linooides* ssp. *viminea*)
San Diego Willowy Mint

HERBACEOUS PERENNIAL

1–3' high, 3–4' spread.

Silvery green, linear leaves. Very aromatic.

Pale rose flowers — long blooming season in summer.

Native habitat: coastal sage scrub, chaparral — rocky washes
below 1000' — southwest San Diego County.

Full sun to part shade.

Water 1 – 2 x / month, maybe more.

Does not tolerate foot traffic.

RARE - CNPS List 1B.1

(Rare, threatened or endangered in California and elsewhere.

Seriously endangered in California).
