

*Pinus edulis*  
Piñon Pine

SMALL CONIFER - evergreen.

10 - 20' high, 10'+ spread.

Broad, flat-top form with numerous trunks from base.

Usually broader than tall.

Dark green needles, 2/bundle.

Native habitat: woodland - desert mountains 4500 - 9000'.

Full sun to part shade.

Frost and drought resistant.

Little or no water (1 x / month).

Very slow growing stately tree.

Good in rock gardens and containers, and for screen plantings.

Seeds are an important food.

**RARE — CNPS List: 4.3**

Uncommon in California;

Not very endangered in California
