

*Solanum hindsianum*  
Mariola

HERBACEOUS SHRUB

To 10' high, to 6' spread, but can be pruned to 3'. Open habit.  
Pale green leaves have felty appearance.  
Pale purple flowers - mainly spring but throughout the year.  
Greenish berries.

Native habitat: scrub on canyon hillsides and in arroyos -  
throughout Baja California and the gulf islands.

Full sun to part shade.

Frost sensitive.

Drought tolerant but will bloom longer with water.

Water 2 - 4 x /month.

Good color contrast.

Good on banks or slopes or in borders.

Green parts, including fruit are poisonous if consumed.
