

Verbena lilacina

Lilac Verbena

PERENNIAL SUBSHRUB — ever-green.

To 3' high, 4' spread.

Mounding, forming round clumps.

Grows fast.

Delicate green leaves.

Flowers light purple — mainly spring, but year round.

Habitat: mountain slopes, ravines, silty areas — Baja California, Cedros Island

Full sun to part shade. Frost tender.

Deep water once per month.

Will grow in any soil but needs good drainage.

Adaptable to growing in pots.

Flowers are fragrant and attract butterflies year-round.

Good low maintenance border plant.

Heat tolerant.
