

Artemisia ludoviciana

Silver Wormwood, Basin Sagebrush

SHRUB—evergreen

2 to 10' high, equal spread. Rounded.

Silvery leaves, 3-lobed at tip, very aromatic.

Flowers—August to October.

Native habitat: sagebrush scrub, chaparral, yellow pine forest, pinyon juniper woodland—dry slopes, plains, and valleys, above 1000' (Baja, western U.S. and California).

Full sun. Frost resistant.

Good drainage. Coarse soil.

Good erosion control. Good food and cover for quail.

Pollen can cause hayfever.
