

*Asclepias eriocarpa*  
Indian Milkweed, Kotolo

Photographs by Margaret L. Fillius

PERENNIAL - deciduous

Erect habit with very hairy stem.

Leaves sometime in whorls of 3 or 4.

Flowers are cream, sometimes tinged with pink and purple -  
summer.

Native habitat: dry barren areas, 700' - 6,000' - California, Ne-  
vada and Baja California.

Full sun.

Requires good drainage.

Drought resistant.

Attracts butterflies.
