

*Eriophyllum nevinii*, (now *Constancea nevinii*)  
Catalina Silverlace,  
Nevin's Woolly Sunflower

Photographs by John R. Hyde

Photograph by Margaret L. Fillius

SUBSHRUB, WOODY PERENNIAL - deciduous.  
2 - 5' high, 2 - 4' wide. Stout stems with mostly basal leaves.  
Fuzzy, lacy leaves to 10" long.  
Yellow flowers in terminal clusters - April to August.

Native habitat: Santa Catalina and San Clemente Islands - rocky coastal bluffs below 100'.

Full sun to part shade.  
Well-drained soil preferred.  
Drought tolerant but can tolerate occasional water.

Larger and woodier than *E. confertiflorum* (Golden Yarrow).

**RARE — CNPS List: 1B.3**

(Rare, threatened or endangered in California and elsewhere. Not very endangered in California.)
