

Eschscholzia californica (& Hybrids)

California Poppy (Hybrids)

ANNUAL

Variable height to a foot or more.
Slender stems. Leaves mostly basal.

Flowers yellows to red-orange -
spring to summer.

Native habitat: grassy, open areas
below 7000' - throughout
California, to south Washing-
ton state, New Mexico and
northwestern Baja California.

Full sun.

Water during active growth.
Summer water extends
bloom.

Plants may reseed after blooming, and
may resprout a second year.
Bright spot in border or mixed bed. Es-
pecially nice with blue flowers.
