

Ranunculus californicus

California Buttercup

Photographs by Margaret L. Fillius

PERENNIAL - deciduous

1' high, 2 - 3' spread. Prostrate to erect.

Leaves attractive by themselves.

Flowers bright yellow; shiny petals - February to April.

Native habitat: moist meadows, grassland - foothills and coastal
below 8000' - from southern Oregon to Baja California.

Full sun to part shade.

Needs good drainage.

Leave it dry in summer.

Can be used in borders or containers.
