

*Symphoricarpos mollis*  
Creeping Snowberry

SHRUB—deciduous

1–3' high, 3' wide. Trailing habit: branches often root.

Flowers pink in clusters - spring.

White berries from fall into winter.

Native habitat: ridges, slopes, open places in woods, below  
10,000' - British Columbia to Southwest California, and to  
New Mexico.

Part shade to full shade. Frost resistant.

Water 1 - 2 x /month.

Good under oak trees.
