

Diplacus longiflorus (*Mimulus longiflorus*,
Mimulus aurantiacus var. *longiflorus*)

Sticky Monkeyflower

WOODY SUBSHRUB

To 5' high, 3' spread.

Sticky leaves, hairy on underside.

Flowers pale yellow — March -
June.

Native habitat: coastal sage scrub,
chaparral — hills, foothills,
canyons up to 7500' in
central and southern
California, including Channel
Islands, and to northern Baja
California.

Full sun.

Needs well-drained soil.

Water while growing and
blooming. No water when
dormant.

Good for dry border or foundation
planting.

Attracts hummingbirds, butterflies.
