## Palmer's Dudleya

Photographs by Al Keuter / Calphotos

PERENNIAL HERB. Succulent  
Height: 4"- 8"; 1 - 8 rosettes, 2" - 21" wide.  
Leaves evergreen, upto 4" long, 2.5" wide, lanceolate.  
Flowers on up to 3' branched inflorescences, orange-pink, fused.

Native Habitat: Coastal rocky areas, inland sandy areas, < 600'. Endemic to California, central coast from San Francisco Bay area south to Santa Barbara.

Full to partial sun

Drainage ?

Drought tolerance unknown, probably requires winter and spring water.

Uncommon in cultivation.
