## Common Tule, Hardstem Bulrush

Photograph by Mike Nelson, iNaturalist, CC-NC

### PERENNIAL GRASS

3'-10' high, 3'-6' wide

Robust green, round, upright stems.

Relatively short leaves at base of stems.

Flowers small in terminal panicles, appearing brown.

Native Habitat: Wetlands and marshes of southwest, to 8500'.

Full sun

Needs saturated soils, standing water.

Good in ponds, or very wet swales.
